

Why an annual eye exam?

Our Doctors recommend that you have your eyes examined annually for multiple vital reasons. Not only is it important to renew your prescription to ensure that you have the most perfect prescription, but also to have the health of your eyes evaluated. Often, patients find out that the changes in their vision are related to dry eyes, cataracts, or other changes in the health of their eyes. These changes are managed much differently than simply changing glasses. By having the health of your eyes evaluated annually, you can be confident that your prescription is accurate and that your Optometrist has done everything they could to maintain your healthy vision.

Medication Alert

Some common medications that may impair your vision:

Pain Killers	Vitamins
Antibiotics	Antihistamines and allergy medication
Antidepressants	Steroids (to treat Asthma)
Cardiac Prescriptions	Oral Contraceptives
Male Enhancement Prescriptions	Herbs such as St John's Wart
Acne medications	

Did you know that eyes ...

- ... are the most complex organs you possess except for your brain?
- ... are composed of more than two million working parts?
- ... can process up to 36,000 bits of information every hour?
- ... can instantaneously set in motion hundreds of muscles and organs around your body.

Take good care of your eyes!

Dr. Scott DeMers
Optometrist

Dr. Scott treats patient of all ages. He specializes in sports wear contacts and glasses and enjoys working with Glaucoma patients. Our office has recently acquired an OCT to better serve our Glaucoma patients. With this new instrument, we can more confidently diagnose certain eye diseases and irregularities.

Dr. Leslie DeMers
Optometrist

Dr. Leslie treats patients of all ages. She specializes in pediatric care along with low vision evaluations for the elderly. Dr. Leslie also enjoys working with challenging contact lens fittings. Within the last year, our office has acquired a Corneal Topographer that aids in determining which type of contact lenses fits each patient the best. In addition, the Corneal Topographer aids in determining whether or not the patient is a good candidate for

Are You Interested in Contacts?

1. Were you told that you are not a good candidate for contacts because of your dry eyes or allergies?
2. Do you dislike how glasses look on you?
3. Have you worn contacts before, but didn't like the feel of them?
4. Do you have astigmatism?
5. Do you wear bifocal, trifocal, or progressive lenses in your glasses?

We have GREAT news!

Even if you answered yes to any of these questions, you may still be a candidate for contacts! We offer contacts for patients with astigmatism, dry eyes/allergies, and for patients who require multifocal correction.

News Flash!

EFFECTIVE July 1 – September 30, 2009

Get a \$100 rebate for *new wearers of the Acuvue Oasys Contact Lenses. This rebate is only available if you purchase a year supply of contacts within 90 days of your comprehensive eye exam and contact lens evaluation.

*new wearers are those who have never filed for an Acuvue Oasys rebate prior to this one.

Will you bill my medical insurance or my vision insurance? Are they different?

Most patients do not realize that they have separate vision benefits from their medical benefits. The reason they see the doctor will determine if we bill medical or vision insurance. An example of a medical visit would be "pink eye". You can find a list of insurance companies that we accept on our website.

Why did I receive a check in the mail from your office?

Whenever a patient arrives at our office for an appointment we strive to charge them only what their insurance requires. Sometimes, an insurance company can cover more than they originally quoted. If this is the case, then we reimburse you the difference!
